

## PRAVILA IGRE

### Joker Supreme

#### About the game

Joker Supreme is a 5-reel, 40 lines video slot featuring a free spins and bonus jackpots.

Theoretical payout is 93.40% to 97.21%

#### Game Features

##### Multiplier Wild Feature

MULTIPLIER WILD symbols substitute for all symbols except BONUS symbols and JACKPOT symbols. When a MULTIPLIER WILD symbol occurs in a winning combination, the pay for the winning combination is multiplied by the value on the MULTIPLIER WILD.

##### Free Spins Bonus

When 3 BONUS symbols appear, the game initiates the FREE SPINS BONUS. The number of initial free spins depends on the selected FEATURE BET value. During the FREE SPINS BONUS, each BONUS ACCUMULATOR symbol increments a counter. For every 3 BONUS ACCUMULATOR symbols that are collected during a FREE SPINS BONUS, 3 additional free spins are awarded.

##### Feature Bet Selector

The base game may be played at 4 different feature bet levels:

- Bet Level 1: MULTIPLIER WILD value is 1X, and each FREE SPINS BONUS begins with 5 initial spins
- Bet Level 2: MULTIPLIER WILD value is 2X, and each FREE SPINS BONUS begins with 8 initial spins
- Bet Level 3: MULTIPLIER WILD value is 3X, and each FREE SPINS BONUS begins with 12 initial spins
- Bet Level 4: MULTIPLIER WILD value is 5X, and each FREE SPINS BONUS begins with 15 initial spins

When a player selects a new Bet Level, the bet for that level is shown immediately as the bet for the game.

##### BONUS JACKPOTS

The game has 4 Bonus Jackpot levels: Bronze, Silver, Gold, and Platinum. When a player wins a Bonus Jackpot, he or she is awarded the value displayed on the interface for the level of bonus jackpot won at the time that it is won. For every bet placed, each Bonus Jackpot value increases in proportion to the total bet placed. The value of each Bonus Jackpot is saved between different sessions for a single player and is saved distinctly for each player.

If any combination of 14 or more JACKPOT symbols land on one spin player wins the Platinum Level Bonus Jackpot;

If any combination of 12 or more JACKPOT symbols land on one spin player wins the Gold Level Bonus Jackpot;

If any combination of 9 or more JACKPOT symbols land on one spin player wins the Silver Level Bonus Jackpot;

If any combination of 7 or more JACKPOT symbols land on one spin player wins the Bronze Level Bonus Jackpot.

Only the highest winning level based on the initial seed value of the jackpot is paid.

In case a Bonus Jackpot is triggered during a FREE SPINS BONUS triggered by the HYPERBONUS selector, the bet used to determine Bonus Jackpot values is the bet that was shown on the interface immediately before opening the HYPERBONUS SELECTOR.

#### HYPERBONUS Selector

If a player selects to play a HYPERBONUS BET, a FREE SPINS BONUS is awarded immediately with a MULTIPLIER WILD value and number of initial spins according to the selected bet. HYPERBONUS Selector shows a variety of options, and for each option the bet amount for the option, the number of initial spins, and the value of the MULTIPLIER WILD are shown. After a selection is confirmed, the FREE SPINS BONUS is played with the selected MULTIPLIER WILD value and number of initial spins, and with the same bet multiplier as is active on the game interface at the time the selection is made.

Payline wins pay in succession from leftmost to right.

Only the highest win per bet line is paid.

The separate payline wins will be displayed on the payline wins during the win presentation.
